"Advanced configuration & application"

At live "Advanced" webinars, the advanced camera configurations are explained and demonstrated. You also have the opportunity to ask questions. After each webinar, there is a task block that is to be worked on until the next day. At the end of the training, the camera configuration file should be sent back to ecampus@mobotix.com. If all tasks have been successfully completed, we will also send an electronic certificate confirming that you have successfully completed the training as "Video Security Professional".
